

Eleonora C. Savino

MARINE BIOLOGIST

Profile

I'm a marine biologist drawn to the way physiology, ecology, and conservation come together to shape life in the ocean. I'm driven by a commitment to understanding and protecting ocean ecosystems. Through fieldwork, lab experience, and conservation-focused volunteer projects across different countries, I've built a versatile scientific skillset and a collaborative, solution-oriented mindset. I seek environments where curiosity meets impact, and I aim to contribute to innovative, international research that supports healthier, more resilient marine ecosystems.

Education

- **MASTER OF MARINE BIOLOGY - 110/110 Cum Laude** 2023-2026
University of Ancona, IT
 - **Thesis:** "Stable Isotope Analysis and Trophic Structure of the Pelagic Community in the Western Mediterranean Sea"
 - **ERASMUS+ STUDY:** University of Algarve, PT 2024-02/2025
- **BACHELOR OF BIOLOGICAL SCIENCE** 2019-2022
University of Salerno, IT
 - **Thesis:** "The impact of plastic pollution on marine life in the Mediterranean Sea"
- **AFS EXCHANGE STUDENT** 2017-2018
Biological High School in Melo, Uruguay

Practical and Research Experience

- **MASTER'S THESIS RESEARCH - ERASMUS+ TRAINEESHIP** 07/2025-02/2026
Institut de Ciències del Mar (ICM) - CSIC, Barcelona, ES
 - Focused on understanding trophic relationships within pelagic ecosystems. Integrated Stable Isotope Analysis (**SIA**) and Stomach Content Analysis (**SCA**) via a multi-tissue approach to evaluate species' dietary habits. Supported by the government-funded OCEANIC project.
- **MASTER INTERNSHIP** 07-08/2024
tartAmare, Tuscany, IT
 - Researched and monitored nesting sites, collected data on nesting activity and hatchling success. Collaborated with a multidisciplinary team on outreach and awareness initiatives.
- **BACHELOR INTERNSHIP** 03-04/2022
"Clinical & Microbiological Diagnostic Center of Dott. Cucci" in SA, IT
 - Prepared culture media, analyzed antibiograms and MIC results, and identified fungi and pathogens microscopically.
- **EXTRACURRICULAR VOLUNTEERING**
 - **LIFE DELFI PROJECT** in Filicudi Wildlife Conservation, Sicily, IT
Rehabilitated marine turtles, monitored marine organisms (cetaceans and microfauna), and contributed to environmental protection outreach.
 - **AFS INTERCULTURAL PROGRAM** in AFS Center in Salerno, IT 2018-2021
Developed cross-cultural communication, leadership, and teamwork skills. Through event documentation, content creation, and social media management.

Information

- [Portfolio](#)
- [LinkedIn](#)
- ellysavino@gmail.com
- Barcelona, Spain

Interests

- Marine biodiversity conservation
- Scientific Diving
- Marine Photography
- Habitat Restoration
- Sustainable Fisheries

Skills

- Advanced Open Water Diver (PADI)
- Trophic Ecology
- Stable Isotope Analysis (SIA)
- Stomach Content Analysis (SCA)
- Environmental Sampling
- Laboratory Sample Processing
- Microscopy & Microbiology
- Taxonomy

Software

- GIS
- R Studio
- Excel
- ImageJ
- Network3D

Languages

- **Italian** - Native language
- **Spanish** - C2
- **English** - B2
- **Portuguese** - A2
